Zyme-O-Aroma Plus Liquid

Description: Zyme-O-Aroma Plus Liquid (ZOAP) is a pectinase preparation with high secondary activities such as B-glucosidase (significant activity) and arabinosidase produced by classic fermentation of selected strains of *Aspergillus niger*. It has been especially developed to enhance the aroma formation from the terpenic precursors of the grapes in the production of white wines.

Properties: ZOAP is standardized at an activity of 2000 BGLU/g. Heavy metals <30ppm (as Lead); Density 1.1-1.25; pH 3.5-5.0; Available as a liquid.

Directions for use: ZOAP can be diluted in a small quantity of cool water before addition in the tank. This allows for optimal dispersion. Add towards the end of primary fermentation to the tank to maintain and enhance aromatic characters.

Hazard warning: Eye protection is recommended. In case of contact with eyes, rinse thoroughly with water.

Dosage: 24-60 mL/Ton -or- 130-330 mL/1000 gal -or- 18-45 drops/5 gal

1 mL = 20 drops

1 drop = 0.05 mL

1 oz = 29.6 mL

Refrigerate this product.
